

It is the vision of DoE to ensure all Tibetan Children in exile receive both traditional and modern education, and thereby enable them to become self-reliant, progressive and contributing members of the community and the world at large, while preserving their distinct language, culture and heritage. The Department of Education, CTA has been putting its best possible effort in improving the education of Tibetan children in exile from the last many decades, however the financial constraint at our end impedes the development to realize the objective. Therefore, we would like to urge you to render your kind support to any of the DoE projects listed below. We appreciate partial funding as well.
